

Cookies Policy

What are cookies and what are they used for?

Cookies were created in 1994 by Lou Montulli, an employee of Netscape, as a solution to the problems caused by the fact that websites could not identify computers that were accessing them. Cookies are labels assigned to devices, and one of their important functions is to tell the website whether two requests come from the same device or from two different devices.

Cookies are saved to the hard drive or memory of the visitor's computer. A cookie is a small file that is sent to the browser and saved on your device when you visit a website. Cookies allow the site to function correctly and improve its performance, as well as giving information to the site owner for statistical or advertising purposes, mainly to personalise the user's navigation experience by remembering preferences and navigation modes.

Cookies can be linked to the device ID, notifying the website when the user returns. Many sites, including this one, use them. Cookies help the site to be more efficient and to remember preferences and user names, register products and services, and personalise pages.

What cookies does e4j use and for what purposes?

Anar autonoleggio-it.eu uses various types of cookies and related technologies, each of which has a specific function. We give you this information as part of our commitment to notify you of recent changes to the law and to ensure clarity with regard to privacy issues on our website autonoleggio-it.eu. To optimise the functioning of the site by personalising it to your preferences and to ensure that the online purchasing system works correctly, your computer, tablet or mobile device should be set to accept cookies. Those devices not accepting cookies may encounter problems during the navigation of the site, especially for those functions that require the login.

Types of cookies

On the Anar site, we use cookies to save the extensions in your cart, remember your details when you return to the site and optimise your online experience. For example, cookies allow us to personalise certain sections of the site to match your preferences, display targeted extensions or payment gateways.

Cookies will not damage your device. All the information that we acquire through the use of cookies is kept secure. We do not have access to or control of the cookies used by our affiliated companies. We do not share the personal information that we collect, such as names, phone numbers or email addresses, with these companies.

The types of cookies that we use are described below.

Navigation cookies

These cookies allow the site to function correctly and allow you to view the content on your device. They recognise the country that you are connecting from and set the site to the relevant language. If you are a registered user, they recognise you and allow you to access the services offered in members areas. Navigation cookies are essential to the functioning of the site, including the sign in phase.

Functional cookies

These cookies recognise you when you return to the site. They allow you to save your information if you wish, so that you do not have to enter it every time you visit. (These are the "remember me" cookies of Joomla!)

If you have added extensions to your cart and closed your session without completing the purchase or removing the items, these cookies save the extensions for a limited period so that you can continue shopping the next time you access the site.

Functional cookies are not essential to the functioning of the site, but they make navigation easier.

Analytics cookies

These cookies analyse the way users navigate the site.

The data is anonymous and is used for statistical purposes only. These cookies are installed by a service provider (Google) on the browser or on the device used to access the site.

Social Network cookies

These cookies allow your social network account to interact with our site, for example by allowing you to give feedback or share the site with your friends. Social network cookies are not essential to navigation.

How can I disable cookies and manage my preferences?

Most browsers allow you to change the settings for accepting, controlling and disabling cookies. Remember, however, that disabling navigation or functional cookies can cause the site to malfunction and/or limit the services available.

Accepting and refusing cookies

By closing the information banner about cookies, continuing to use this site, clicking anywhere on the page, or scrolling up or down, you automatically accept Anar Cookies Policy, and cookies will be used during your visit. If you leave the site, any cookies already installed on your browser will remain there, but they will no longer be read or used by Anar unless you later accept the Cookie Policy. These cookies can be removed at any time from your browser, just search for "cookie" in the help section of your browser or in the Settings page.
